

S2

Designer Chrissie Catling's interest in shape and form has seen her turn a talent for interior design into wearable fashion. S2 garments embrace the beauty of the natural landscape and draw inspiration from architecture and nature rather than contemporary trends. The passionate, self-taught designer launched S2 in 2004 and immediately attracted a loyal following from women with a strong sense of style and individualism. Since then her bold minimalist look, built around gorgeous, quality fabrics and interesting cuts, has continued to advance and command attention.
